

Sheet 3 • The pair that decides O2a vs O2b

One of the 10 tables that rotate and then fit at full size, from designtask-flow.md. Panel A is exactly what md2pdf does today: a landscape page, 10pt text, the author’s column proportions intact. Panel B is what O2a would do instead. O2b keeps panel A and reflows only when landscape would also need shrinking.

A • TODAY — rotated, full size, authored proportions.

Step	Actor	Action
1	System	Fetches submission record — only completed submissions are reviewable
2	System	Renders read-only submission detail view (all captured values, photos, signatures)
3	User	Reads through the submission
4	User	Selects review decision: approved, rejected, or revision_requested
5	System	If rejected or revision_requested: requires a comment before proceeding
6	User	(Optional) Applies one or more content flags independent of the review decision: safety_concern compliance_issue data_quality anomaly escalation
7	User	Submits review
8	System	Validates comment present if required
9	System	Calls reviewSubmission — transitions completed → reviewed
10	System	Sets review_status to approved / rejected / revision_requested; stores reviewer ID, timestamp, comment, and any content flags
11	System	Emits SubmissionReviewed domain event
12	System	(Performance) Sends email notification to the operator

B · O2a — reflowed in portrait, no page turn.
